ENVIRONMENTAL SCHOOL DESCRIPTION

The Living Earth Environmental School is composed of a minimum of forty hours of study of specific units divided into four courses of ten hours each that includes a two-hour field trip. The courses investigate AIR, LAND, and WATER. The units are divided into Ecology and Environmental Science, Life on Earth and Earth Stewardship.

A multiple-choice examination (open book/open note) on the lectures and recommended reading is optional. Exams must be taken by those who want to be certified as an Environmental Consultant.

GOALS AND OBJECTIVES

- A. Develop a citizenry that is aware of, and concerned about, the total environment and its associated problems, and which has the knowledge, attitude, motivation, skill and commitment to work individually and collectively toward solutions of current problems and the prevention of new ones.
- B. Promote the NGC, Inc. Environmental School.
- C. Foster value systems that preserve the biotic community.
- D. Increase awareness of the interdependencies of life on earth.
- E. Prevent pollution to protect public health and heal the planet.
- F. Help citizens become involved with their communities and the natural world.

G. Network and reach out to all segments of the community to achieve common goals.

H. Encourage conservation education programs in all levels of garden club activity.

I. Promote the inclusion of environmental education in classrooms and youth organizations throughout the country.

J. Establish Environmental Councils to provide opportunity for personal growth and community service for NGC, Inc. Environmental Consultants and Provisionals.
